

ESTIMATED CONTRIBUTION OF CODED WIRE TAGGED RELEASES OF CHINOOK
SALMON (Oncorhynchus tshawytscha) TO THE COMMERCIAL FISHERIES OF
SOUTHEASTERN ALASKA IN 1983

APPENDIX A

Volume IV

By:
Robert P. Marshall
and
John E. Clark

April 1986

ADF&G TECHNICAL DATA REPORTS

This series of reports is designed to facilitate prompt reporting of data from studies conducted by the Alaska Department of Fish and Game, especially studies which may be of direct and immediate interest to scientists of other agencies.

The primary purpose of these reports is presentation of data. Description of programs and data collection methods is included only to the extent required for interpretation of the data. Analysis is generally limited to that necessary for clarification of data collection methods and interpretation of the basic data. No attempt is made in these reports to present analysis of the data relative to its ultimate or intended use.

Data presented in these reports is intended to be final, however, some revisions may occasionally be necessary. Minor revision will be made via errata sheets. Major revisions will be made in the form of revised reports.

Appendix A, Volume IV, presents the estimated contributions of tagged releases of chinook salmon having a State of Oregon or a State of California hatchery or wild stock tag code, which were represented by tagged fish captured in Alaskan fisheries during the 1983 calendar year. Contributions are ordered by ascending coded wire tag (CWT) codes. The number of tags having a specific code and recovered by area (No.), the estimated total number of tags in that commercial catch stratum (Tags), and the total estimated number of fish from the release group identified by the given tag code (Exp.) are presented for fisheries and gillnet gear (tables with an -a suffix), purse seine gear (tables with a -b suffix), troll gear by district (tables with a -c suffix), and troll by PMFC and quadrant (tables with a -d suffix). Standard errors are noted in parentheses below the estimates. Information associated with each release (tag code, last month in which fish were released, agency which conducted the tagging, facility where the fish were reared, site where the fish were released, run type, brood year, age [European notation] of the fish when it was caught, total number of tagged and untagged fish released, and number of tagged fish released) are given above each table. The row label 'Unknw Stat Week' refers to coded wire tags which were recovered in unknown time strata. The column label 'Unrecorded District' refers to tags recovered in an unknown area strata. A listing of the specific tags which could not be assigned to a known fishery strata are recorded in the comments following the troll fishery tables. Note that commercial catch (fish ticket) data cannot be associated with tags taken from fish captured at unknown times, in unknown areas, or with unknown gear, so that expansions for the number of these tags to numbers of fish of the release group in the catch cannot be made. Note also that in a wild stock tagging study the number of untagged fish is unknown, so that expansions of the number of estimated tags in the harvest to total contributions of that wild stock to the commercial catch is impossible.

Table 153c. Estimated contribution of chinook salmon belonging to tag group 065818 to the 1983 Southeastern Alaskan hand and power troll fisheries reported by statistical area.

Standard errors are in parentheses below the estimates.

Note: A total of 3 chinook salmon belonging to tag group 071734 were counted in Southeastern Alaskan commercial fisheries. However the type of gear is unknown. The district of catch is Unknown and week of catch is 28. Tag code 071734 identifies BONNEVILLE. Fall chinook salmon of the 1979 brood year, released at TANNER CR in 11/80 and caught at age 03. The total number of fish released was 654678 of which 51274 were tagged.

Note: A total of 1 chinook salmon belonging to tag group 072207 were counted in Southeastern Alaskan commercial fisheries. However the type of gear is unknown. The district of catch is Unknown and week of catch is 28. Tag code 072207 identifies BONNEVILLE Fall chinook salmon of the 1979 brood year, released at TANNER CR in 06/80 and caught at age 03. The total number of fish released was 104586 of which 100717 were tagged.

Note: A total of 1 chinook salmon belonging to tag group 603111 were counted in Southeastern Alaskan commercial fisheries. However the type of gear is unknown. The district of catch is Unknown and week of catch is 28. Tag code 603111 identifies OREGON AQUA-FOODS Fall chinook salmon of the 1978 brood year, released at YAKUINA BAY in 12/79 and caught at age 04. The total number of fish released was 14770 of which 14253 were tagged.

Table 235c. Estimated contribution of chinook salmon belonging to tag group 603113 to the 1983 Southeastern Alaskan hand and power troll fisheries reported by statistical area.

Standard errors are in parentheses below the estimates.
